## Food Waste and Climate Change Pre/Post Survey Answer Key

1.	is a long-term change in the Earth's climate.			
	Climate change	Eutrophication	Food waste	
2.		there is, the _ess	_ methane is produced	
3.	Earth'sAtmosphere	is the layer of gases surro Climate change	ounding Earth. Ecosystems	
4.	is the process of rotting.			
	Recycling	Decomposition	Leachate	
5.	Food waste decompo	osing in a landfill creates_ Ecosystems	 Habitat	
6.	I feelr	eady to learn.		
	Not Sort of	Very – no ri	aht answar	

## Food Waste and Climate Change Pre/Post Survey

Participant Number:			Pre or Post	
1.	is a long-term change in the Earth's climate.			
	Climate change	Eutrophication	Food waste	
2.	The more food waste there is, the		methane is produced.	
	More	Less		
3.	Earth's is the layer of gases surrounding Earth.			
	Atmosphere	Climate change	Ecosystems	
4.	is the process of rotting.			
	Recycling	Decomposition	Leachate	
5.	Food waste decomposing in a landfill creates			
	Methane	Ecosystems	Habitat	
6.	I feel ready to learn.			
	Not Sort o	f Verv
